For Cleveland's Ukrainians and Jews, Demjanjuk Trial Stirs Up Old Enmity

By Michael Dobbs

Washington Post Service CLEVELAND — For three decades, John Demjanjuk seemed an unremarkable man leading an unremarkable life. He puttered about his garden, mended kids' bicycles and attended the local Ukrainian Orthodox Church. Few people asked about his past.

These days, a lot of people care passionately about Mr. Demjanjuk's past. The retired Cleveland anto worker has speet the past five weeks in a Jerusalem courtroom on trial for crimes against humanity during World War II. Holocaust survi-vors have identified him as "Ivan the Terrible," a sadistic guard who operated the gas chambers at: the Treblinks concentration camp and tortured

thousands of Jews on the way to their deaths. Here in Cleveland, where Mr. Demjanjuk spent most of his adult life, the case has reopened historical wounds between Ukrainians and Jews who emigrated from the same part of Eastern Europe, for many of the same reasons, to opposite

sides of the Cuyahoga River. For many of the city's 70,000 Jews on the river's eastern bank, the Jerusalem trial rekindles memories of their ancestors' sufferings: vicious pogroms, collaboration between the Ukrainian militia and the Nazi Gestapo, the exodus of Jews from the Ukraine

before the advancing German Army in 1940. "Ev-Nazis."

But in the houses among the pirogi bars and onion-shaped church domes west of the nver, ethnic Ukrainians talk of Jews collaborating with Russians and Poles and of the devastating famine caused by Stalin in the 1930s that killed as many as six million Ukrainians. Many among the 50,000 ethnic Ukrainians in Cleveland say they believe the Soviets and Jewish activists.

"This case has created exactly what the Jews want to prevent: more anti-Semitism," said Bill Liscynecky, president of the Cleveland branch of the Ukrainian Congress Committee, which represents most of the 1.5 million Ukrainians in the United States

The Ukrainian and Jewish communities in Cleveland have similar roots --- and similar motives for leaving them. Both groups moved to the United States not only to survive but to raise their children in a land free of persecution. They were attracted to such places as Cleveland, Detroit and Pittsburgh during an industrial boom.

- - - -

"It was a terrible, terrible time," said Lucy Their ancestors may have been neighbors in the in Ohio in 1952 from a refugee camp. He bought a Zalishiak, a Jewish emigrée from Odessa who fled Ukraine, but Jews and Ukrainians had little to do house in Parma, an industrial suburb whose ethnic with each other there or in the United States. The ery nation has its heroes and collaborators - and Ukrainians settled within sight of the sprawing it's true that some Ukrainians hid Jews. Unfortu- smokestack industries along Lake Erie. The Jews, nately, however, most of them worked for the the mainstay of the garment industry, created their oeighborhoods in middle-class residential districts

across the Cuyahoga. When Mr. Demjanjuk was stripped of his U.S. citizenship in 1981, in proceedings begun after another Ukrainian immigrant raised questions about his identity, bundreds of Jews and Ukraini-ans gathered outside the Cleveland courtroom, waving banners and hurling abuse at one another. that Mr. Demjanjuk is the victim of a plot between Since then, the two communities have maintained a steady barrage of polemics through the news media.

Earlier, Mr. Demjanjuk had seemed typical enough of the 50,000 Ukrainians who migrated to the United States as "displaced persons" after the . war. Mr. Liscynecky describes him as "a peasant boy" with only four years of education who never left much of an impression on anyone. His parish priest, Father Stephen, Hankiewych, who knew him for 26 years, said he is a "practicing Christian who attended church regularly" and was devoted to his wife and two grown children.

Like many of his countrymen, Mr. Demjanjuk

character is reflected in the domes of St. Vladimir's Church and signs such as those pointing out "Holowchak Funeral Home" and "Dimitri's Restaurant." He speaks little English.

The pivotal event in Mr. Demjanjuk's childhood was the great famine of the early 1930s, conceived by Stalin as a way of destroying the independent Ukrainian peasantry, collectivizing agriculture and diverting the food supply to feed a new indus-trial work force. Mr. Demjanjuk told friends he remembered peasants in his village trading their bouses for a single losf of bread. Several members of his family died in the catastrophe.

According to an undercover Israeli policeman who shared a prison cell with Mr. Demjanjuk before the trial, the former acto worker blamed the famine on a Soviet leader of Jewish extraction, Lazar M. Kaganovich. The policeman told the Jerusalem court that Mr. Demjanjuk had referred to Kaganovich as a zhid, a derogatory Ukrainian term for a Jew.

It was against this background of Stalinist atrocities that many Ukrainians welcomed the German invasion of the Soviet Union in 1941. "When Hitler came, it was hurrah for Hitler," said

migrated to Cleveland as an orphan after the war "Nobody had read 'Mein Kampf."

After surrendering to German forces without much of a fight, Mr. Demjanjuk and hundreds of thousands of other Red Army soldiers faced a choice between collaboration and slow starvation in prisoner-of-war camps. Some refused to cooperste with the Nazis and ended up in camps. Others joined a Ukrainian Army formed by the Germans to fight the Russians. And some were recruited as guards and orderlies for the Nazi death factories across Eastern Europe.

Exactly what Mr. Demjanjuk did during the crucial years 1942 to 1944 --- when as many as a million people, most of them Jews, were killed at Treblinka - is the subject of the Jerusalem trial. His accusers maintain that he was a particularly cruel guard at the camp in Poland. His defenders insist that he is the victim of a terrible case of mistaken identity.

In the chaos that marked the end of the war, it was difficult to sort the Nazi collaborators from the heroes. As staunch anti-Communists, the Ukrainians were welcomed by the United States at a time when relations with the Soviet Union were deteriorating sharply.

The deportation proceedings against Mr. Demjanjuk were based in part on a Soviet-supplied

anomalies on which his office appears to rest. A conservative, he was voted into office last year in an election marked by a split in his adversaries' camp. The split robbed his Socialist predecessor, Dimitris Beis, of vital Communist support and forced a runoff, in which Mr. Evert prevailed.

And such is the uneven division of power between the central authorities and the city that the mayor's ambitious plans for a new look to Greece's clogged and polinted capital may he realized, to a large extent, only by the spending and efforts of the Socialist govern-ment of his adversary, Prime Minister Andreas Papandreou.

Yet in the view of some Western diplomats and Greek analysts, Mr. Event, a 48-year-old former minister of finance much given to laughter, is the prime contender in the internal power plays of the New Democracy opposition for the leadership held by Constantine Mitsotakis.

the military base negotiations here. saying that more strike days have

Greek leadership, and some political analysts call him the heir apparent. The impression of political advancement

is not one that Mr. Evert seeks to dispel. "Every cadet leaving the military academy thinks he can become a general," he said. "So every politician has this ambioon. And I have this ambition.

Not he added, that be was in any hurry, while he yet had the mayoral job to do; it is a job with a term of four years, two years beyond the next scheduled general elections in 1989, and with problems that seem far more obvious than their solutions.

more obvious than their solutions. Athens has rapidly grown but without a development strategy. Yet, in the city and its environs, he said, 250,000 Greeks were un-employed, so that jobs had to be found, somehow, without further industrialization. "The answer is that Athens should change," he said, adding that it should be-

come a commercial and service center for an entire region, the kind of place Beirut was before the Lebanese civil war began tearing t apart in 1975.

Then, he said, there was revenue to he sained from tourists, who in recent years have tended to avoid the capital and "go straight to the Aegean with their bathing suits without passing through Athena."

problems as a polloted environment, eversnarled traffic and a growing crime rate. Yet such problems may also be turned to

political advantage. The mayor, for instance, has no jurisdiction over major public works, such as the long-projected plan for a subway, or transportation policy, or even the city's archaeo-logical sites. But in pressing the government authorities to improve the lives of the city's 2.5 million to force the lives of the city's 3.5 million to four million people, he may seek to finesse his adversaries, taking credit for any improvements that are made and lambasting them for those that are oot.

"I'm not going to come up against Papandreou for straight political reasons," he said. "But if I think that he does not move on with what I'm suggesting, he's going to have a bad

Mr. Papandreou's father, George, was prime minister in the 1950s, and a son named George also holds a parliamentary seat on behalf of his father's party.

Mr. Event's father, by contrast, was police chief of Athens during the Nazi occupation of the city, a bit of family history for which his critics have criticized him. Many Jews

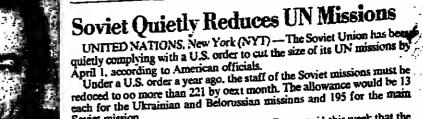

The more immediate concerns of Athe-nians, he said, lay in rapid solutions to such treasure that memory, because his father issued false identity papers to thousands of Greek Jews, showing them to be Christians so they could avoid Nazi persecution.

In the election campaign last year, Mr. Evert's predecessor, Mr. Beis, alluded darkly to Zionist backing for his ehallenger in re-marks that were widely interpreted as anti-Semitic. As at other points in the campaign, Mr. Event sought to turn the barbs against Mr. Beis by naming two Jews in the opposition ticket.

In a similar manner, his critics sought to mickname him "bulldozer," a reference to a brash style reinforced by physical girth. He responded, he said, by having a campaign leaflet printed, picturing him with "an ex-pression like a bulldozer on my face" and a real bulldozer in the background, along with a family clutching architectural plans, as if to promise a commitment to renewal.

Mr. Event's wife, Lisa, is American, as is Mr. Papandreou's wife. Mr. Evert and his wife met in Athens while her father was director of the American Archeological School

"Beware," he said smilingly, "of politicians with American wives."

eharged Afghanistan with unpro-voked attacks and territorial violatioos, issued a much stronger protest than usual by warning the Afghan government that it would strike back.

The entire responsibility for the serious consequences of such acts and unprovoked aggression against Pakistani territory would rest oo the Kabul authorities," it said.

Pakistan does not recognize the Afghan government and it aids and shelters Moslem guerrillas fighting the Communist government in Ka-bul. The Afghan government is supported by about 115,000 Soviet

100005 Afghan jets twice attacked Pakistani territory late last month, killing more than 100 people.

Bomb Kills 7 in Lahore

Pakistani officials said that a bomb hidden under a carpet exploded early Tuesday during an anti-government rally in Labore, killing seven persons and injuring more than 100 in Pakistan's second-largest city, United Press In-Pakistan, which often bas ternational reported from Islamabad.

About 4,000 people were attending the midnight rally by the Ja-miyet Ahl-e-Hadis, an opposidon group, on Pakistan's National Day when the blast occurred.

The group's leader, Allama Ehsan Elahi Zaheer, and its vice president, Maulana Habibur Rehman, were among the injured.

at an emergency meeting to discuss the selection of pro-the slaying last week of Italy's head gates. He told about of aerospace weapons, while efforts to form a new government appeared to be failing.

The meeting, under a caretaker prime minister, Bettino Craxi, incloded heads of Italy's three police forces, secret service chiefs and the defense, justice and interior ministers

The participants said they had discussed a document found Moneral said that a president leads "when he understands that openly day in four major cities claiming responsibility for the murder Fricommunicated policies, even if soday of an air force general, Licio cretly arrived at, are the only poli-Giorgicri.

cies that merit enduring support." The documents said the Union of Fighting Communists, an off-shoot of the Red Brigades urban guerrilla group, was responsible for the killing. General Giorgieri, bead of Italy's space and air weapons

procurement, was shot by two men on a motorcycle. Meanwhile, efforts by the Christian Democratic prime minister-designate, Giulio Andreotti, to re-

place the outgoiog coalitinn government were foundering. The politicians were already fac-ing criticism for a dispute that appears to be focused more on a powor struggle between the majority Christian Democrats and Mr. Craxi's Socialists than on the coun-

try's need for stability. They also have been attacked as having complacently lowered their mand against urban terrorism.

Negotiations among the partners of the coalition, which resigned on March 3, were deadlocked over three nuclear energy referendums due in June.

If Mr. Andreotti admits defeat. after two weeks of intense efforts to find a compromise, general elections are almost certain to follow, a year ahead of schedule.

gates. He told about 1,100 supporters at a fund-raising dinner Monday night: "What I offer is leadership. Leadership to take our country safely into the next decade, to build a more prosperous America, leadership to dedicate America to excellence in all fields, and leadership, above all, of an America willing and able to keep the peace." Without directly referring to the Iran-contra affair, the former gen-

U.S. Says Soviet Military Deploys Lasers

WASHINGTON - Defense Secretary Caspar W. Weinberger, presenting the Pentagon's annual review of Soviet military power, said Tuesday that Soviet lasers have inflicted casualties and damaged equipment in Afghanistan and other locations.

Page 4

Mr. Weinberger, summarizing the Defense Department's sixth as-sessment of Soviet military capabilities, also said Moscow is "clearly dedicated" to fielding "a whole new generation" of mobile intercontinental ballistic missiles by the mid-1990s.

Beer, Man, Civilization: Which Came Second? U.S. Anthropologist Says Alcohol Set Hunters on Road to Farming

By William K. Stevens

New York Times Service PHILADELPHIA - Why, 10,000 years or so ago, did people first settle down and go to all the trouble of sowing, cultivating and reaping crops? The question has long tantalized anthropologists and archaeologists because once its answer is clear, they will know what sparked the long transformation of umans from wandering hunters into literate city dwellers. Beer did it, argues an anthropol-ogist at the University of Pennsyl-

The event that "primed the

pump," according to this new hy-pothesis, was the accidental discovery by prehistoric humans that wild wheat and barley soaked in water to make gruel, if left out in the open air, did not spoil. Instead, natural yeast in the air converted it to a dark, bubbling brew that made whoever drank it feel good. On top of that, the brew made people robust; at the time, it was second only in animal protein as a nutritional source.

vania.

This combination of mood-altering and nutritional properties would have been incentive enough to cause neolithic hunter-gatherers in the Near East to begin cultivating the grains, Solomon H. Katz contends in an article published this month in Expedition, the journai of the Museum of Archeology/Anthropology at the University of Pennsylvania. "My argument," Mr. Katz said

in an interview, "is that the initial discovery of a stable way to produce alcohol provided enormous motivation for continuing to go out and collect these seeds and try to get them to do better."

New York Times Service LENINGRAD - Spring in Leningrad might well have been designed by the city fathers as a deliberate affront to the city's cenarries old rival, Moscow,

fire to the gilt spire of the Admiralty tower and the dome of St. Isaac's Cathedral. Buildings blush with colors for which lipstick companies spend huge sums to invent names. A visitor from drab Moscow cannot help feeling, on a first walk along the still-frozen canals, that Leningraders are entitled to their helief that they have achieved a higher level of civilization.

But something seems not to be happening here. The city revered as Russia's cultural cyster bed, the city of Pushkin and Dostoyevsky, has not kept up with the pace of change set by Moscow under Mik-hail S. Gorbachev's banner of glasnost, or openness.

The impression is confirmed, gradgingly, by a variety of Lenin-graders and Westerners who know the city. Leningrad remains a treasure house of Russia's past, hut Moscow, they say, is now where the action is in arts and letters, music and film.

Mowplace city, the place where the grad twice canceled the premiere best actors and musicians aspire to before the film was opened in 10 perform. But Leningrad's artists, especially its unofficial and semiofficial poets, bards, painters and jazz musicians, have played a stimulating role - Off Broadway to Moscow's Broadway. It is easy to imagine that Leningrad's cultural scene would prosper under the cultural thaw.

But many people in Leningrad agree that so far, glasnost, Mr. Gor-bachev's slogan for the increased intellectual candor that has so titillated the West, has remained disproportionately a Moscow phe-

There is nothing much going on," said a Leningrad filmmaker. In large part that is because the celebrated intellectual events of the last year have not been products of a new creative renaissance so much as a political attic cleaning.

Those events have involved either the release of older works long suppressed, or newer works whose daring is judged less on artistic merit than by a willingness to tack-

anniversary.

events include the planned publica-tion of banned fiction hy Boris Pas-cow party leader, Boris N. Yeltsin, ternak and Vladimir Nabokov; the is an exemplar of the Gorbachev release of "Repentance," an anti-Stalinist, allegorical film; and the impending publication of Anatoli N. Rybakov's novel "Children of ary journals to be during, and they The northern light washes the the Arbat." These are political now scramole to output that is in pushing the limits of what is acceptable.

Chadians' Capture Of Libyan Air Base Is a Blow to Gadhafi

By Edward Cody hington Post Service

PARIS - The capture by Chadian forces of the Libyan air base at Ouadi Doum is a major military and psychological victory that threatens to diminish Colonel Moammar Gadhafi's longstanding role in Chad, according to French and U.S. officials.

French-supported troops loyal to President Hissène Habrè captured the main Libyan airstrip in Chad at a desert settlement in a fierce battle Sunday. Chad's forces captured an undisclosed number of anks, armored personnel carriers and aircraft, a diplomat at the U.S. Emhassy in Ndjamena, the Chad-

ian capital, said Monday. Onadi Doum's 12,500-foot (3,750-meter) runway had made it the main Libyan logistics center in Chad, a forward base for resupply flights to Libyan troops to the south and east. Its loss leaves Colonel Gadhafi's forces in Chad with

no dependable supply route for Faya-Largeau, the last major Libyan garrison in Chad south of the Tibesti mountain region near the border with Libya, a French mili-

tary officer said. "This was an important victory for Habre." he said.

"Gadhafi must be very embarrassed - very," said the U.S. diplo-mat. "Ouadi Doum was a strategic hinge for the Libyan presence

Libya has long claimed the Aozou strip, a slice of northernmost Chad that is ricb in minerals. Libya annexed the area in 1975 and has supported various Chadian rebel groups in the 20 years of civil war. On Jan. 2, Mr. Habré's forces

vowed to assert government control over the entire northern region. About the same time, the defection to Mr. Habre of Libya's former rebel allies under Goukouni Oueddei left Colonel Gadhafi without control of the Tibesti mountains and, according to French officials, changed the war from a civil conflict into a Chadian-Libyan one.

Page 5

With Mr. Habre now controlling Quadi Doum, and with a resupply of French military equipment, government forces are expected to seek next to attack Faya-Largeau, Mr. Habre's hometown and the principal center in northern Chad still under Libvan control.

The loss of Faya-Largeau would mark an important political defeat for Colonel Gadhafi, limiting his control to the Aozou strip for the first time in several years and raising questions about his ability to continue pursuing political and military goals in Chad.

France, which was Chad's colonial ruler, has played a major role in supporting Mr. Habre's government with funds, arms and advice.

Earlier this month France increased the number of its troops in Chad to about 2,200, backed by Jaguar and Mirage F-1 lighterbombers and Gazelle helicopters with missiles. The French Defense Ministry said Monday that these troops did not participate in fight-ing for Ouadi Doum, but it acknowledged French logistical support for Mr. Habré's forces.

The Reagan administration has hacked Mr. Habre's forces eagerly, principally out of hostility toward Colonel Gadhafi and reluctance to see his influence spread. Washington announced \$15 million in spedrove the Libyan garrison from cial military aid last December, Fada, Colonel Gadhafi's other adding to a regular U.S. military main Chadian stronghold, and aid program of \$8 million

Also is under way in a highly publi-cized "war of invitations" between the East German president, Erich Honecker, and West Berlin's may-

cross the Berlin Wall to attend official ceremonies, at the risk of compromising longstanding legal positions related to the status of the

Lost in all this is the fact that it apparently is not really Berlin's 750th anniversary. Adolf Hitler fixed the date of the

city's founding at 1237 when he wanted a reason 50 years ago to organize a 700th anniversary jubi-loe a year after the 1936 Summer

Olympics in Berlin. The Nazis' historical source was a document dated Oct. 28, 1237, describing a dispute over how much church tax the margrave of Brandenburg owed the local bish-op. The problem is that the document mentioned only the commu-sty of Cölln, on what is now an stand in the Spree River in East Berlin.

The earliest known reference to Berlin came seven years later, but Hitler considered the Collin referally merged with Berlin. The city authorities, East and

West, now, have picked up where Hitler left off. They are using the anniversary to revive interest in Berlin as a tourism and business center, and to burnish their contradictory claims over what their respective parts of the city represent. Each has planned an interna-

tional conference of mayors, and lined up a heavy schedule of cultural events. There even are rival boat processions on the Spree and the

In spite of the similar schedules, there are important distinctions in the approaches.

The Communist authorities, for instance, are using the event to push the idea that East Berlin is the legitimate heir to the city's history as a capital dating from the time of Frederick the Great.

This is in line with efforts in recent years to restore a sense of German pride in East Germany after decades of emphasizing that the creation of a socialist state had marked a definitive hreak with the

Into Dangerous Waters

For years, Iran and Iraq have been at-tacking each other's shipping in the Gulf's "tanker war." The Iranians, who are on the march but cannot match Iraq's air power, recently started moving up anti-ship mis-siles to control the mouth of the Guif. The U.S. government decided to bring up the Kitty Hawk and to accept a request by Kuwait to escort its ships through the Strait of Hormuz. Thus a measurably greater pos-sibility now exists that the United States may become directly engaged in the war.

Page 6

There is a logic to the American decision. Iran threatens not only the survival of the Baghdad regime and the stability of other Arab governments friendly to Washington but also the flow of oil to the West. The United States is asserting a legitimate interest in upholding free navigation in international waters. The Reagan administra-tion has its own requirement, after its collapsed arms-for-hostages dealings with Iran, to show support for the Arab cause. Nonetheless, the fact is that Iran and Iraq

have tried to choke off each other's vital maritime traffic. This poses a policy dilemma that Washington has not fully grasped. Under one professed goal, freedom of navigation, the United States should be evenhanded and should restrain Iraq as well as Iran, since both countries interfere with navigation. But under a second purpose,

support of American friends in the region, the United States unmistakably tilts toward Iraq, since Iraq is friendly and Iran, although it is a strategic place, is oot. Naturally, the Iraqis would be pleased to

have the American fleet protecting their hfeline. Kuwait's situation is more complex. While asking the United States for escort help, it sought balance by also asking the Soviet Union. Both said yes, but the Americans, who are not eager to admit the Soviets as a Gulf partner, would prefer to do the whole job themselves.

Iran voices alarm at a pattern of American conduct that could possibly cut its lifeline. It urges Washington to pursue freedom of navigation for all countries. Such a policy would stop Tehran from further attacks on Iraqi - and Kuwaiti - shipping. But, more important to Iran, it would keep the American navy from coming in effect to Iraq's side. But that does not seem to be

the way things are going. A striking turn of events is apparent. At home the United States is still sorting out a failed initiative launched in part to gain strategic advantage in Iran. In the Gulf, the United States finds events drawing it out of its professed neutrality and into at least the edges of the tanker war, in support of Iraq. This is a moment for extraordinary care. - THE WASHINGTON POST.

Helpless in Thailand

Thailand, seeing no end to providing asylum for Indochinese refugees, has turned against them with acts of extortion, brutality and life-endangering forced repatriation. The Thais bave committed the acts, yet the United States must share the blame; its declining role m this long-playing refu-gee story has contributed to the Thai frustration. A humane ending requires a recom-mitment from both Bangkok and Washing-

To the Thais, the West appears to have stopped honoring its pledge to resettle hun-dreds of thousands of refugees to whom Thailand has given first asyhum. The Thais have reacted sharply, closing camps, pushing would-be entrants away and now, worst of all, forcing some refugees back to their homelands, (Thirty-eight Hmong tribesmen in a camp under United Nations protection were returned last week against their will to Laos, where their lives are clearly endangered. Bangkok contends that they were not refugees but anti-Communist guerrillas. But the guerrillas took first steps to become refugees once they entered the camps and laid

down their arms.) And reports abound that extortion fees have become the norm, and that Thais are giving refugees little opportunity to prove their bona fides.

The immediate need is for U.S. Embassy officials in Bangkok and United Nations officials to assure protection for the remain-ing refugees. The longer-term need is to reaffirm the American commitment. The Thais have seen the number resettled in the United States decline steadily. If America would commit itself to sustaining the current level of around 30,000 Indochinese refugees for several years, Thailand would be assured that it would not be left to manage this problem alone.

In return, Thailand needs to maintain adequate first asylum. With continued international support, it must ensure orderly entry procedures, adequate protection and decent living conditions. For Thai and U.S. officials, this is a matter that has run on exasperatingly long, long enough so that they may forget something crucial: For the refugees, it remains a matter of life or death. - THE NEW YORK TIMES.

Consensus Needs Funding

The Reagan administration, which began its life at the United Nations as a sharp critic of the organization, is ending up as a booster. The transformation is the result of efforts to introduce internal reforms. These justify and require, the administration now says, a restoration of the U.S. financial support that was withheld while the United Nations was still in its retrogressive "politi-

defer to small states whose reason for being there is to have a role in a forum where power does not depend on size alone.

Then there is the matter of funding. The United States got its way in reform not by smoothly managing consensus but by pres-suring the organization with unilateral fund cuts - cuts that went into muscle, not just into fat. This is what produced such anoma-

The Debt Burden Is the Heritage of Authoritarian Governments

OPINION

SAN FRANCISCO - Marin Vargas Llosa, the Peruvian writer, was talling about hopes and problems in Latin America. "If we Latin Americans do win the battle for

A statutetti suo.

ence of the Trilateral Commission here, several hundred mostly establishment types from Eu-rope, Japan and the United States. The subject was Third World debt. Because he is a novelist and not a politician, banker or bureaucrat, he feit no need to varnish ugly truths.

"We and we alone are responsible for our future," he said, evoking the centuries of absolute power and lawlessness, from pro-Colombian empires through colonial days to the present, which established a tradition of violence. But something new is happening-Democratic governments are emerging in most countries of the comment based, as he put it, on the will of the "humble, nameless men and women, the usually poor, often illiterate people of our countries."

They have been spurred, he said, by "the terrible violence of which they have been the victims. This violence, the result of intolerance, fanaticism and dogma, has been practiced both by revolutionary terrorists and by political or

U.S.-European Dialogue Needs a Political Forum

By Leo Tindemans

The writer, Belgian minister of external relations and a former prime minister, is president of the European Community's Council of Ministers.

B day, the European Community's founding Treaty of Rome was signed thresh out encough. by six member states that have grown to become twelve. They are now celebrating three decades of a commitment that has thoroughly changed their presence on the world scene. This

evolution is not yet finished. My countryman, Paul-Henri Spaak, was devoted to European unity. He used to say how he was struck by a newspaper photograph in 1945 show-ing an American and a Soviet soldier thaking hands at the Elbe River in Germany. The caption read, "Libera-tion of Europe." At the time, Europeans with vision realized that more cooperation was needed oot only to overcome their postwar economic difficulties but to assert Europe's voice in a world dominated by superpowers.

The first advocates of postwar European integration - Jean Monnet, Spaak and others -- were great friends of America and realized how important a role it would play in the recovery of Europe. In those days, European unity was encouraged by American statesmen such as Dean Acheson, In 1962, President Kennedy formulated the ideal of cooperation between Europe and the United States in the slogan, "equal partnership."

A quarter century later, the question is asked: Can the United States and the European Community be partners and allies while at the same time becoming fiercer competitors? It

ing. Since the early 1970s, the EC states have tried to achieve a common stand on international issues. Results have at times been disappointing. Slowly but steadily, though, Europe has been speaking more often with one voice. For example, the 12 recently joined in calling for an international conference on Middle East peace.

This evolution is a natural consequence of more cooperation, and it corresponds with the broader goals envisioned at the time of the Community's foundation. The evolution will be even more evident when the newly ratified amendments to the Treaty of

Rome are implemented. The U.S. side has repeatedly object-ed that Europeans do not contribute enough to their own defense. But when Europeans make an effort to reflect about their own security, for instance in the framework of the Westem European Union, suspicions are aroused in Washington. And Europeans were alarmed when they saw how casually matters vital to their defense were dealt with in Reykjavik by the Americans and the Russians.

military counterterrorists, and has littered our continent with the dead, the tortured, the kidnapped, the disappeared - and these people in

their vast majority have been the poor. "The ordinary people have opted for de-mocracy in an attempt to find an escape from this nightmare reality of civil war, terrorism, indiscriminate repression, revolutionary 'tax-

Only democracy can bring the reforms Latin America needs to work its way out of its historic vicious circle.

es,' blind executions and the proliferation of torture... They decided to support that system which, intuitively and instinctively, they thought would be best able to defend

human rights, or oppress them least." Mr. Vargas Llosa has no illusions about how hard it will be for the societies to change themselves and their habits. But he is convinced that lack of democracy is not so much

By Flora Lewis

the result as the cause of underdevelopment. Nor is it a coincidence that when at last there is movement, the societies are caught in

an economic grinder that deprives them of the means to meet their peoples' basic needs. Some factors are beyond their control, such as Some factors are beyond their control, such as the fall of commodity prices on which they rely for export earnings. But the debt burden itself is the heritage of the authoritarian gov-ernments that they have just shaken off. Only democrary, Mr. Vargas Llosa be-lieves, can bring the reforms that Lain Amer-

ica requires to achieve development and social justice, to work its way out of its historic vicious circle. "Moreover, I am convinced -although I'm not sure whether to be happy or sad about it - that when a Latin American nation chooses democracy, it not only chooses freedom and the rule of law but the most extreme form of independence as well.

"This is because oo other type of government receives less support from the West ... than those regimes in the Third World that try to live the ideals of freedom and pluralism which are the West's greatest contribution to the world. I doubt that any democratic nation in the underdeveloped

world has received the credits and subsidies

world has received the credits and subsidies Cuba has received from the Soviet Union. "And it is certainly true that no Latin American nation fighting to live in peace and freedom within the law ever before aroused the militant sympathy that Sandinist Nicara-gua has inspired in liberal and progressive circles in the West." Mr. Vareas Llosa is not bitter and he was

Mr. Vargas Llosa is not bitter and he was not blaming anyone. He was pleading for a "sensible and realistic" approach from credi-tor countries that would allow the fragile democracies to pay off their debts as they are able, without destroying their social bases. He suggested, for example, that debt service be linked to export prices.

There are other ways of reducing the squeeze, but there is not much chance for a democracy to survive if miserable living stan-dards continue to be forced downward. The alternatives are new military or revolutionary regimes, more economic stagnation, more mis-ery. "Let us all make an effort to contribute ery. Let us an make an error to commune whatever we can to see that it works," he asked. It is a thoughtful, moving appeal, in the best interest of the United States as well. Novelists, who must use their imagination, can sometimes see more clearly than men of authority. The New York Times.

cized" phase. Yet difficult hurdles remain. The first is a certain lingering skepticism on the American right, but not only there, about the worth and permanence of UN reform. The key U.S. demand was to give donors, of which Washington has always been the largest, a measure of control more commensurate with their dues. This was done by gaining approval for a new requirement for "consensus" on budget levels and priorities. The administration insists to Congress that the new regime will "measurably increase" donor influence.

We think it is worth a try. But candor compels acknowledgment that the civility and mutual restraint needed to make consensus work are not everyday qualities at the United Nations. Nor is there a clear American view, let alone a clear view in the organization as a whole, of how much power Washington ought to wield or how much it should

lies as President Reagan's presentation of the National Medal of Science to the director of the WHO smallpox eradication prograin last March, even as the World Health Organization was being starved of the funds to launch an aggressive attack on the new epidemic of AIDS. A restoration of funding is now essential in order to show the good-faith commitment in the reform that the U.S. government demanded of the United Nations' other members.

But look at what is actually happening to the U.S. budget. The administration asks Congress to put up money for the United Nations and its specialized agencies from this point onward, but it has no plans to sock funds to make up the arrearages that accumulated in the period of bludgeoning. This is oot fair. It is bound to reduce the incentive of other members to make "consensus" work. -THE WASHINGTON POST.

On Second Thought ...

Some presidencies, like Lyndon Johnson's in Vietnam, failed through tragedies too deep for any individual to avert. Others have gone awry through such egregious blunders that it seems that an ounce of common sense in the president's car would surely have saved him. What if presidents were to install not just a biographer, as President Reagan has done with Edmund Morris, but a designated savior in the White House, charged to speak only in the presence of what he deemed a historic goof.

"If you must invade Cuba, don't try it without air cover," the official blunderblocker might have said to John Kennedy. To Richard Nixon: "This third-rate burglary is going to become an impeachable offense." To Gerald Ford: "Pardoning this felon will prove unpardonable." To Jimmy Carter: "For this rescue mission to work, we need a miracle." And to Ronald Reagan: "Trading arms to the Iranians for hostages is totally contrary to your stated policy."

Would presidents intent on bold action listen to such naysaying? Suppose they were encouraged to appoint someone of undoubted stature. Imagine this certified eminence sitting impassively in the Oval Office, saying

4

ŧ.

not a word for month after month. Then, one awesome day, he clears his throat. Would that not get the chief executive's attention? Presidency after presidency has stumbled not due to the machinations of enemies but due to colossal misjudgments. "If but one of the major policy mistakes we examined had been avoided," the Tower commission repined, "the nation's history would bear one less scar, one less embarrassment, one less opportunity for opponents to reverse the principles this nation seeks to preserve and advance in the world." Even if the official mistake-minder's cautions were ignored, at least the peal of his helpless laughter might stir useful doubts.

But history, however fixable it may seem, cannot be changed so easily. Think how soon the designated savior would acquire a staff of his own, and an avid taste for being Washington's inside-most insider. He would grow to share the president's preves and obsessions. And come the day when the president committed a blunder of catastrophic girth, the official wimess, grown as oblivious to error as his master, would require a savior of his own.

_ _ _ _

is too easy to say that this is somefriends. We oeed to have the courage to cope with our conflicts. The European Community has in-

creasingly become a cohesive economic unit, with its own interests, preferences and trade policy. It also has the basis of a common currency. Recently, economic relations with the United States have become more strained, with a major trade crisis carrving the menaoe of a vicious circle of retaliation. The United States and the European Community are fighting more frequently over outlets for their excess corn and wheat. Complaints are heard about protectionism, currency manipulations and budget deficits. Most accusations are not groundless. The United States and the 12 Euro-

pean Community states share some institutionalized channels for commumication: They are members of GATT and the OECD; and each year, four European nations meet with Japan, the United States and Canada to

PARIS - While at the trial of John Demjanjuk Israel experi-

ences a cathartic recounting of the

Jewish experience at Treblinks, a

controversy has been going on con-

WASHINGTON -- For years the idea that the United States should withdraw its troops from Euthing that happens among the best of rope has been a favorite hobbyhorse of the American left. Now the proposal is picking up support from con-

servatives. It remains a bad idea. Some, such as Henry Kissinger, have spoken in general terms about reducing U.S. forces in Europe as part of a broader plan to reform NATO. Others, such as Zbigniew Brzezinski, have been more specific. urging that 100,000 troops be brought home. Still others, such as Melvin Krauss, a neoconservative economist and the author of "How NATO Weakens the West," advocate a total U.S. pullout from Europe and the abandonment of NATO.

They are wrong. Maintaining a free, independent and democratic Western Europe remains the pre-eminent strategic interest of the United States. In global terms, the loss of Western Europe would be as signifi-cant as the Chinese-Soviet split -with America on the losing end. Recognizing this, two generations

It Wasn't Unique, for All Its Horrors

The writer is U.S. ambassador to West Germany.

of Americans and Europeans have If the withdrawn forces are to be established and refined a security sysdemobilized once they return home, tem based on the engagement of U.S. power in Europe — both a nuclear we should frankly recognize such reductions for what they are: a monuguarantee and a substantial combat mental step toward unilateral dispresence. This security system, with armament. This would leave the its two important American ele-United States an army of half a milments, has succeeded beyond all exlion men, turning it from a superpowet into a military and political dwarf. • Europe is of declining strategic pectations. For 40 years, Western Europe has remained stable and free. The case for a U.S. withdrawal importance. Zbigniew Brzezinski has

rests oo three principal fallacies: • It would save money. Melvin Krauss arenes that the U.S. commitment to NATO costs more than \$130 billion a year and suggests that the money could be saved simply by pulling out of Europe. But these savings would not be realized if forces withdrawn from Enrope were moved to the United States or elsewhere. Several recent studies indicate that redeployment woold probably cost more than the status quo. In West Germa-

noted the military problems America faces elsewhere in the world, especially in the Gulf and Southwest Asia, where energy concerns and religious fundamentalism continue to threaten Western interests. He argues that a cutback in Europe would make it casicr to react to contingencies elsewhere, notably m Central America. But for the Soviets, the countries of Western Europe remain the biggest prize. Of all Soviet forces, the most

numerous, the most capable, and the ny, for example, U.S. forces use more best trained are arrayed against than 2.000 rent-free installations. Western Europe, Soviet conventional and ouclear forces threatening Europe have been getting stronger. There are threats in other regions,

and America must deal with them. But to weaken its capabilities in the most cracial theater simply to strengthen them elsewhere is had strategy. This would make it more likely that conflicts in other regions spread to Europe where, having withdrawn substantial forces, America would be at a disadvantage. • A U.S. troop withdrawal would

stiffen European resolve. This argument displays a fundamental misun-derstanding of European realities. Western Europe has moved gradually toward economic and political unity since 1945, but this has been possible only because of the stability provided by the U.S. troop presence.

The Europeans themselves admit that they are far from military independence. Even the French, the big-gest champions of European independence and defense autonomy, say

clear, for example, that they would not be able to replace the U.S. securi-ty commitment to West Germany

with a guarantee of their own. Contrary to widespread belief, the Europeans now provide the bulk of NATO forces for the defense of Europe. They provide 90 percent of the the land forces, 75 percent of the naval forces and 50 percent of the air forces in Western Europe.

The strongest supporters of an en-hanced European defense effort also happen to be the strongest supporters of the U.S. military presence in Europe. They understand that a U.S. withdrawal would strengthen those in Europe who favor unilateral disarmament as a way of seeking an accommodation with Moscow. So U.S. withdrawals would demoralize the very people who are working for a stronger European defense identity. The real threat to the alliance is the

unhealthy symbiosis that is emerging between leftist critics of the alliance in Europe and critics on the right in the United States. A perverse mirror-image phenomenon may come about. ricans who call for greater U.S.

unilateralism will encourage the for in Europe that favor appeasement. The next few years will be crucial

for NATO. There is a growing consensus on both sides of the Atlantic that the defense of Europe requires an improvement in NATO's conventional forces. There is also growing recognition, demonstrated at Reykjavik, that a reduced reliance on nuclear weapons is desirable.

The United States could soon have an agreement with Moscow, for ex-ample, to eliminate all U.S. and Soviet intermediate-range missiles in Enrope. How would a substantial troop reduction fit into a Western strategy of improving conventional defenses, reducing reliance on nuclear weapons and providing a more stable balance of forces? The answer is clear: It would undermine all of these efforts.

1937: Blockade Spain? 1931: Blockade Spain? PARIS — Means of putting an end to Italy's intervention in the Spanish war were discussed [on March 24] by Yvon Delbos, Foreign Minister, with Sir George Clerk, British Ambessa-dor. The two, it was reported, were in agreement that it was essential for France and Great Britain not to per-mit Arther disembarkation of Italian troops in Spain and if accessery to int turther discontranson of tauan troops in Spain and, if necessary, to enforce the non-intervention policy by a Franco-British uaval blockade of Nationalist Spain LONDON - King Leopold's visit to

London ended in success. Belgium is to be released from its obligate at 10 oc released from its obligate at under the Anglo-French-Belgian agreement of March 19, 1936, which followed Germany's remilitarization of the Rhineland. That agreement provided for mutual offers to encertate the explanation of Salar-ed-Dowich, thus doing away with the necessity of Russian troops. Beigium is now withdrawing.

cerning Poland's prewar treatment of Jews and an alleged Polish com-plicity in Hitler's "final solution." cles on Polish anti-Semitism - on the prewar situation, on "Shoah," That anti-Semitism was an imand on a third case of Polish-Jewish portant phenomenon in prewar Pocontroversy, a recent project (now abandaned) by Polish Ramao Catholics to install a convent of the land is beyond dispute. Some argue that the principal Nazi death camps were located in Poland because the contemplative Carmelite order at Poles could be counted on to acquiesce in the workings of the camps or

even to collaborate with the Nazis. The Poles themselves made up what was almost certainly the second largest group of those put to death in Nazi extermination camps. The Nazis held Poles to be an inferior people whose role in a Nazi Europe was to be that of laborer or servant. Some three million Poles were killed, including about half of all those in possession of a higher education. The program was to eliminate the intelligentsia and the leadership class so as to block any national resurgence of the Poles. Jews and Poles were nut, nf course, the only victims of the Nazi racial purge. About four and a half million other Slavs and some 50,000 Gypsies were killed, as well as a considerable oumber of Germans

who were insanc or disabled. The question of Polish guilt in the extermination of the Jews was the subject of the film "Shoah." by the French director Claude Lanzmann, which has been shown widely in Europe and North America. The case he makes against the Poles has been contested as a distorted picture of the reality, but it has also led to a challenge to the Polisb conscience from within Poland.

· · · ·

way, so that even acts meant as **By William Pfaff** atonement serve as provocations. In the midst of the controversy In January and February, the Roman Catholic journal Tygodnik Powszechny published three arti-

there appeared, in the Jan. 29 issue of The New York Review of Books, a long letter by an Israeli scholar of Polish origins who, as a child, expenenced the siege of the Warsaw Ghetto and two years as a prisoner in the Bergen-Belsen camp.

One may contest the writer's arguments, as many will. But with great nobility of spirit and moral screnity, the author, Israel Shahak, maintains that it is a mistake to treat evil, even the evil of the Holocaust, as if it were confined in a single human group. The Holocaust, he says, was an immense but not unique case in history of the deliberate massacre of racial and political minorities, and thus it partook of an evil to which we all are volnerable, as potential partici-pants as well as potential victims.

The extermination of the Jews by the Nazis," he writes, "with all its horrors ... was not unique, and one can only begin to understand it when one sees that it was not unique - in two ways.

First, by trying to see that the majority of human beings really be-haved almost all the time in a perfectly typical human way, we may perhaps be prepared for other similar borrors which may well come.

ings (of whatever group) ... but to look higher, and without despising this majority, to try in the hour of trial to be better."

International Herald Tribune.

Auschwitz. The project was seen by many Jews as an unwelcome Christian intrusion into a place of great symbolic meaning to modern Jews.

These articles and their authors were attacked as "anti-Polish." One critic, a lawyer, offered the old ratio-nales of anti-Semitism, saying there was hostility toward the Jews be-cause they had, before the war, dominated trade and taken more than

their share of places in the schools and universities. He said they could not really be helped during the war because of their "passivity."

This provoked furious protests. The controversy goes on today, and not only in Poland. The matter has been debated at conferences at Oxford and in the United States, and in The New York Review of Books. the magazine Commentary, and

elsewhere in the press. An eminent British historian, Norman Davies, has claimed in a lawsuit that he was denied an appointment at Stanford University in California because Jewish faculty members considered his work insensitive toward the

Jews and unacceptably defensive of Polish gentiles in World War II. There is something inexpressibly sad in witnessing these two peoples, who suffered so much from the Na-

zis, at odds with one another in this

Contraction and the second

OPINION

A Conspiracy to Defraud the United States?

WASHINGTON - What criminal charges might result from the spe-cial prosecutor's investigation of the Iran-contra affair? Among many possi-bilities one stands out. That would be a broad charge of conspiracy in the supply of arms to the Nicaraguan contras at a time when the U.S. Congress had barred

official military support. The independent counsel, Lawrence Walsh, is at too early a stage of his investigation for anyone to know whether he will find enough evidence of such a conspiracy to put it to a grand jury and seek indictments. But there have been

ABROAD AT HOME

Bublished reports of hidden activities that seem to fit the relevant criminal statute. Lieutenant Colonel Officer North ran a

network, complete with Swiss bank ac-counts, that funneled arms and money to the contras. The crews of supposedly private planes that dropped weapons to them made telephone calls to White House numbers, including Colonel North's A contra leader, Alfonso Robelo Callejas, says he got \$10,000 a month through the colonel for a year.

Then there was the money siphoned from the arms sales to Iran. Some appears to have gone as ransom to Lebanese kidnappers and kickbacks to Iranian officials. But whatever went to the contras would fit into such a conspiracy charge.

The relevant statute is the conspiracy fection in the U.S. Code: Section 371 of Title 18. It punishes conspiracies to commit other specific offenses listed in the code. But it goes beyond listed offenses to panish, more generally, con-spiracy "to defraud the United States."

A conspiracy to defraud, under that statute, does not require proof that the government suffered any financial loss. It need merely involve the misuse of government resources - personnel, for example - for ends that are corrupt or that interfere with the proper functions of government. As long ago as 1910 the Supreme Court wrote:

The statute is broad enough in its terms to include any conspiracy for the purpose of impairing, obstructing or de-feating the lawful function of any department of government."

The Watergate cover-up prosecution relied in part on that conspiracy statute. H.R. Haldeman, John Ehrlichman and John Mitchell were convicted of conspiracy to defraud the nation "of the government's right" to have officials of the Justice Department and the CIA "transact their official business honestly and impartially, free from corruption." On the contras, it might be argued

Letters intended for publication should be addressed "Letters to the Editor" and contain the writer's signature, name and full address. Letters should be brief and are subject to editing. We cannot be responsible for the return of unsolicited manuscripts. By Anthony Lewis

that officials conspired to defraud the United States if they used their position, resources and time to defeat what was then the law: the Boland amendment forbidding official arms supplies. There would no doubt be evidence of concealment, as in Watergate; that indictment spoke of "deceit, craft, trickery ... "

The Boland amendment was not a criminal law. For that reason some have jumped to the conclusion that there is no penalty for violating the policy it laid down. But a conspiracy designed to defeat the policy could well be pun-ished under the conspiracy statute. The maximum penalty is five years in prison and a fine of \$10,000

and a fine of \$10,000. Everything will depend on the evi-dence dug out by Mr. Walsh and the 17 lawyers and many investigators he has working on the facts. But there is reason to believe he is focusing, first, on the question of aid to the contras.

One clue is that the House and Senate committees on the Iran-contra affair, when they reached their extraordinary agreement to work together, announced

that they would investigate the contra supply operation before turning to the Iran arms sales. The committees made that decision after talks with Mr. Walsh. There are other relevant statutes:

on perjury and obstruction of justice, for example. Also, Section 2778 of Title 22 makes it a crime, punishable by up to two years in prison and a \$100,000 fine, to export arms in violation of the rules. The statute exempts officials only if they are carrying out a "sales

program authorized by law." Looming behind all possible criminal prosecutions is the question of President Reagan's role. Suppose Colonel North and Rear Admiral John Poindexter are given partial immunity and compelled to testify. Suppose they say that they were following the president's orders. At his press conference last week Mr. Reagan said with emphasis: "I set the policy in this administration." At this stage all is speculation, hut I think one thing is clear. We have been paying too much attention to such pass-

ing phenomena as press conferences. The greater engine for discovering the truth is the criminal law. The New York Tanes

LETTERS TO THE EDITOR

It Should Never Be Absurd to Demand Democracy

In "Poland: America's Reversal Is Late a no for Lane Kirkland, the union leadbut Welcome" (March 18), Tad Szulc writes: "To expect or demand a U.S.-type democracy in Poland anytime soon is absurd ... " So, it is not absurd to demand democracy for Chile, Uganda or Indonesia, but it is absord to demand it for Poland? Why would it be absurd to demand it at any time for anybody, and why would a person living in democracy feel it absurd to demand it for somebody else? After all, the Solidarity moveme of 1980-1981, and what remains of it today, was an almost unanimous demand for democracy by the Poles. Was it ab-surd? Is it absurd to demand democracy

for any Communist country? It is, of course, absurd to expect democracy to come to these countries soon, just as it is absurd to expect that it will come from above. But shouldn't one distinguish between expectations and de-mands? Shouldn't the first be based on political analysis and the second on some values? Should we demand only what we are sure to get? Perhaps this is what the West is doing, while the Communists always demand what they want and not just what seems possible. This is why we

are retreating and they are advancing. Mr. Szulc rejoices. One Jozef Czyrek, who "is really second in command to General Jaruzelski," even dined with Senator Edward Kennedy in Washington. Did they discuss the reasons why the senator could not get a visa to travel to Poland less than three months ago? Maybe Mr. Czyrek was explaining the rules on Americans getting visas to Po-land - a yes for the actress Jane Fonda,

11 E 1.

· · · ·

er. Maybe they discussed the issue of political pluralism; Mr. Szulc sees "a form" of this emerging. Poles, who knew democracy and political pluralism in the 18th century, have not lost their taste for it. They will not be satisfied with "a form" of it. That is what they are demanding, even today, and it is absurd to call these demands absurd.

> IRENA LASOTA, President, Institute for Democracy in Eastern Europe, New York.

Regarding the opinion column "Singa-pore: Have Three, While Minding the Image" (March 19) by Richard Reeves:

ously sought to build conditions for racial harmony. As a member of a minuscale minority group, I can state that nothing is further from the truth than the allegation that the government's

barely replacing themselves. Within every racial group, those families most able to look after children the better educated, higher-income families - are having fewer children. The problem reaches its most acute among women university graduates; large numbers never marry, and when they do they uniformly under-replace themselves. This is true of Malay graduate women.

present trends continued, this would not happen for centuries. But if present trends are not corrected quickly, the overall population will start declining within a generation. To prevent this, the government is encouraging all families to have three children, provided they can afford to bring them up well. The tax incentives to support this policy treat all races evenly. Surely Mr. Reeves is not suggesting that Singapore should follow a policy of two children per Chinese family, but three per non-Chinese? Countries such as Sweden, France and West Germany have used incentives even more generous than Singapore's to

encourage couples to have more children. The only difference is that, while the shift in reproduction patterns in Western Europe has taken a century, Singapore's economic and social devel opment has been so rapid that the switch from a policy of birth control to a policy of birth encouragement has had to be made within one generation.

Our legal justification for star wars testing was flawed, and mistakes were made. I take full responsibility."

Frozen Flakes of Pollution Foul an Ancient Wilderness

By David Wann

D ENVER - Water trickled from the melting snowpack in the summer heat, gathering speed as it flowed over the thin mountain soil and past the bases of tail Engelman spruces before spilling into Lake Elbert far below. Shimmering in the summer sun, the high valley lake in the Mount Zirkel Wilderness Area north of Steamboat Springs, Colorado, was filling as it had

MEANWHILE

for ages with its annual infusion of snowmelt - an event that Lake Elbert's delicate ecosystem depended upon. The snowmelt was not as pure as it

had been for thousands of years. A complex set of chemical reactions was taking place in the lake. The crystal waters, floating in a natural bowl of granite and quartz, mingled with the snowmelt, which was subtly contaminated by sulfur dioxide emitted mostly from power plants, smelters and factories, and by nitrogen oxides emitted mostly from ve-

hicles and power plants. The source of the contamination was the snow itself - acid snow that had fallen throughout the winter and spring from clouds fouled by pollutants.

Acid snow - the winter version of acid rain --- is a new specter confronting researchers who recently began studying it in great detail not only at Lake Elbert but at many other sites across the West.

Much is known about acid rain and how its mixture of pollutants poisons lakes and ecosystems in the Eastern United States, Canada and Europe. But not much is known about acid snow and the degree to which it could be poisoning pristine wilderness lakes in the West. American scientists began investigat-ing the problem in 1985 when the Environmental Protection Agency and the U.S. Forest Service launched the \$4 million Western lakes survey. Nearly 800 lakes were sampled that fall. Early results carried good news and ugly possibilities. The survey has not found significant impact on Western lakes by acid precipi-tation. The mean annual levels of acidity in Western rainfall are currently two to four times lower than in the East. Yet, studies in the Eastern United States and in Europe have shown that damages have occurred in sensitive lakes at levels of acidity not much higher than those occurring in the Rocky Mountains.

Perhaps the most sobering discovery is that acid snow can pack a far more powerful first punch than acid rain. As a snowpack builds, the pollutants in layer upon layer of contaminated snow filter to the bottom of the pack where, within a few months, a substantial concentration of pollutants accumulates. Up to 70 percent of the pollutants can be released in the first spring melts, injecting a pulse of acidity into a lake that can jolt the ecological balance.

Fastern lakes have built-in buffers against acidity, such as thick bottoms of mud and high levels of suspended particles that act as neutralizers. But Western lakes are among the most sensitive in the world, according to surveys. Their gran-ite-and-quartz lake beds cannot neutralize acids; lake bed soil levels are thin -very little soil is washed into mountain

Page 7

vegetation to help neutralize the acids. The lakes are virtually helpless in contending with acid precipitation. The acidity eventually dissolves, but the damage caused by annual jolts of sulfuric acid and nitric acid eventually can

take a high toll on aquatic life. Typically, the impact of acid rain is felt in two stages. First, there is a decline in the acid-neutralizing capacity of surface waters and soils. Depending on variables such as the amount of acid precipitation, the sensitivity of native species, and the structural characteristics of the coosystems, effects may begin to be seen after several years.

In the second stage, there is a decrease in the diversity and productivity of aquatic species. Certain species of algae, insects, mollusks, zooplankton, fish and amphibians are sensitive to acidity, and birds and mammals may consequently suffer a shortage of food or an accumu lation of toxic metals.

Most projections indicate that despite the closing of several smelters in the Southwest and a decrease in average emissions per vehicle, total nitrogen oxide and sulfur dioxide emissions will remain steady through 1995. This is because of a slight increase in the total number of vehicles and power plants.

"The effects of acid deposition can be so subtle that we can't determine the severity on the basis of just a few years' worth of data," said Larry Svoboda, regional acid rain coordinator for EPA. But the consequences - as well as the uncertainties - are just too vast to sit back and do nothing." EPA officials said last week that new

studies showed that 300 lakes in the Northeast could be acidified by acid rain in the next 50 years if nothing is done, doubling the number of affected lakes in the region. This summer, the agency plans to expand its lake testing. It is an unsettling thought while hik-

ing the mountains and meadows of the Lake Elbert area to wonder whether those feather-like cirrus clouds in the bright hlue sky could be slowly, subtly broadcasting the seeds of ruin for the Mount Zirkel Wilderness, The preserve has remained essentially unchanged for thousands of years. Environmental science is committed to keeping it that way.

The writer works in the office of external affairs at the Environmental Protection Agency in Denver. He contributed this comment to the Denver Post.

The worry is not that the Malays will overwhelm the Chinese in numbers; if

People Policy in Singapore

Since independence, the Singapore government has earnestly and strenu-

population policy seeks "to maintain the overwhelming Chinese majority." The demographic trends that have led to this new policy are not secret. Among the racial groups, the Chinese have the lowest fertility rate - 1.5 live births per woman, compared with 2.1 for Malays, 1.9 for Indians and 2.4 for other minor-

ity groups. The level required for zero population growth is 2.1. In other words, the Chinese, and to a lesser extent the Indians, are failing to reproduce

"Three of Our Own themselves, and even the Malays are In response to "Many U.S. Catholics Say Edict Will Be Ignored" (March 13): Poor Heidi Plummer of San Francis-

co, who, lamenting the Vatican document on human reproduction, says of her adopted son: "We love Trevor, but we want our own child. Parenting is such a strong urge ... " Mrs. Plummer apparently cannot distinguish between the arge to parent and the egotistical urge

to see oneself reproduced. I hope little Trevor never learns that

and the state of t

Short is it: The view from Ungaro, left, and Valentino.

Valentino, Ungaro Cut It Beautiful

By Hebe Dorsey memanonal Heruki Tribune **PARIS** — As the collections near their end, the mood in Paris is up. Besides good collections from Mugler, Montana and Chanel, Valentino and Ungaro gave couture

PARIS FASHION

designers' ready-to-wear a shot in the arm. Both of these collections came close to these designers' lofty couture.

Everybody was smiling after Valention's collection, which was like watching "Lifestyles of the Rich and Famous." Valentinn is a happy man who knows who his clients are and what they want. He keeps giving them unashamedly pretty clothes with one purpose in mind - to make them more beautiful. The silhouette was still pencilslim hut it was softer, curvier and shorter. Shoulders were strong hut they softened as the show weni on. The favorite suit was a short, rounded jacket edged with sofuly bristling black fox. It was put over

skinny minis, mini-sarongs ar fully flared, wide-legged pants. Tweeds, giant cheeks and houndstooths were Valentino's favorite fabrics when it came to shaping short, strongly belted coats. Deluxe embroidered suede skirts, started some seasons ago, were also very much around, but this time, they featured giant suede checks over slick black leather. The panther theme, a favorite this season, was used for just about everything, from gloves to turbans and twin

The evening wear was sheer se-duction. Dawn Melln, president of Bergdorf Goodman, loved having so much to choose from. The prettiest dresses were the short ones, which ranged from serious velvet th flirtations white lace ruffles, cut across by bright satin bows. Although Valentino showed some

DOONESBURY

INS MASS OF NEURONS. SIERPA I

Actually, the costuming is ecleotic. Some soldiers are medieval, others contemporary. Henry IV and his ministers sport sober Edwardian frock coats, but Prince

easy. Well, casier.

Hal's lounging attire is jeans, which points up the guif between them. Falstaff is a striped-suited saloonbar dandy, but his cronies - who outlive him -are 1980s riffraff in a recognizably rundown pub. Gradually the contrasts even out; we watch the new world taking over from the old. It is all summed up in the fight between Hal and Hotspur at Shrewsbury. Hotspur, the relic of chivalry, actually lets his opponent reclaim his fallen sword; Hal, when the luck goes his way, has no

such scruples and plays the butcher. He doesn't enjoy it, but a prince has gotta do what a prince has gotta do. And eventually what a king has gotta do. Hal sacrifices numanity to become a political and military machine.

The mix is stimulating, while it is a mix. By the time we get to "Henry V" modernity has wholly taken over, with the Agincourt campaign

staged - ingeniously - as if it were the Falklands. It really feels like war, but in this atmosphere illusion and reality, which have Hal's humanity, and his scruples, make no sense, and the play be-comes monotonons. Shakespeare liked Henry V, Bogdanov doesn't, and Pennington, gallanuly speaking the lines, is left in the middle. He is far more interesting as the earlier Hal, caught between two worlds.

The plays, especially "Henry V," are staged to give us Bogdanov's view of Thatcher's England: dulow. plicity and opportunism at the top,

violent desperation at the bottom and jingoism all the way through (Nobody can say that Bogdanov sentimentalizes the lower orders; Henry's troops invade France like soccer hooligans). The coherence of his vision is less impressive though than the detail with which he animates it. He too is

an opportunist, as a director has to be, especially with plays as big as these. Most nf the characters come to life, and the "Henry IV" plays are unusually funny. Bogdanov is happier with humor than with emo-

agonizingly unfinished, and who want actors to bring them to life. In the original, the play being re-hearsed is one of Pirandello's own, which may explain why the actors take this science-fiction irruption o completely in their stride. In the National Theatre's new production, Nicholas Wright's adaptation has them rehearing "Hamlet," a play with its own pertinent remarks

Search of an Author" a rehearsa

is famously interrupted by a va-

grant sextet whose author left them

about acting and believing. Otherwise, Michael Rudman's production is faithful; there is no attempt to pretend that we are anywhere but in the Italian theater of the 1920s. We begin with some witty vignetics of actors arriving for work, though the later company scenes are strangely stiff. If the actors are meant to represent surface reality, it doesn't help to have them

sitting around making significant remarks at scripted moments. Real life, especially real theatrical life, is less organized than that. But Rudman's conscientious pays off with the arguments about

never seemed more urgent. We feel the frustration of the characters as their pristine sense of their own identity is swamped by the wellneaning mannerisms of the actors. We see how swiftly belief can be induced by a thoroughly artificial stage set, assembled from stock.

There is an uncomfortable acting gulf between the old, who are assured, and the young, who are cal-

INTERNATIONAL MANAGER

As a Shepherd Divideth **His Sheep From the Goats** By SHERRY BUCHANAN

International Herald Tribune

ONDON - Managers who grew accustomed to taking exams in business school think nothing of taking the ability tests required by some corporations. But personality tests, used for recruitment, promotion or team building, are a different story. Critics argue that such tests stereotype people. They also warn that such subjective information can be used against a candidate for a job or a promotion, although employers deny it. Multinational companies that use the tests, such as the Unil-

ever group, the French food conglomerate BSN, Lafthansa AG, British Petroleum Co., Imperial Chemical Industries PLC, Exton Corp. and General Electric

Co., argue that they help the company select a person who will fit in well at the entry level; orient a middle manage toward his next best job, and, at the senior level, to build teams of executives who will get along with each other.

"Most companies have a

good idea of what they are looking for but they also worry about being fair," said Elizabeth Taylor, senior psychologist with NFER-NELSON Publishing Co., the largest British publisher of psychological tests. The company also shows personnel directors how to use the tests. "We warn companies against trying to match people to an ideal industry profile; that is dangerous. We advise them instead to devise their own internal profile of the type of manager they are looking for."

The two most commonly used tests in the United States, Britain, France and West Germany are the 16PF tests developed by the American psychologist R.B. Cattell and the Myers-Briggs Type Indicator test, based on Jungian theory and developed by two American psychologists after World War II. Both tests have been translated into French, German and Italian. International companies, such as Lufthansa, the West German

airline, use the 16PF test as part of the selection process for recent graduates. The test measures 16 personality characteristics, such as whether a young manager is outgoing or reserved, suspicious or trusting, happy-go-lucky or serious.

FER-NELSON estimates that 30,000 Britons, 80 percent of them managers, took the 16PF last year, up 30 percent from 1983. Although West German, Swiss and Austrian companies have started to use personality tests, they have been more cautious. Verlag Hans Huber introduced 16PF in Bern in 1983. But sales of the tests have remained constant over the past three years. The company will not disclose the size of the market.

In 1984, Saville & Holdsworth Ltd., the British psychological assessment and publishing firm, introduced the Occupational Personality Questionnaire, which measures 30 personality characteristics and links specific occupations to personality. To date, 200 British companies such as ICI, BP and National Westminster Bank are using the test, as are Hongkong & Shanghai Bank and the Australian airline Quantas.

But the biggest increase in the corporate use of personality testing has been in the use of the Myers-Boggs Type Indicator. Exxon and GE use the test for team building, career development and internal promotion.

"The point of this test is to feed back the information to the person," said Mrs. Taylor of NFER-NELSON. "Then everybody in the team discusses each others' profiles. A tremendous amount of trust is needed for it to work?"

In the United States, 1.5 million people took the Myers-Briggs Type Indicator test in 1986, according to the Consulting Psycho-logists Press. Corporations accounted for 40 percent of the test sales, double the share of 1983. In England, according to NFER-NELSON, use of the Myers-Briggs test also has doubled over the

Bank of China Takes to Capitalism

But Hong Kong **Expansion Has**

Risky Footing By Nicholas D. Kristof New York Times Service

HONG KONG - As recently as eight years ago, the Bank of China served merely as a stodgy outpost here of the Beijing gov-**CIDment**

But since China's opening to the West in 1979, the bank's growth has been extraordinary. According to its statements, deposits are 5.8 times higher, loans have risen 8.5 times and revenue is up twelvefold. The Bank of China group has taken to capitalist-style competition so well, in fact, that it has become the colony's second-biggest bank after the giant Hongkong & Shanghai Banking Corp. The Bank of China seems to

think this is just a start. It is building a 70-story headquarters that will be Hong Kong's tallest building, with executive offices looking down on Hongkong and Shanghai Banking Corp. headquarters. "It's extremely competitive,

both in terms of service and in economic growth in coming terms of interest rates," said David K.P. Li, chief executive of the Bank of East Asia Ltd., another Hong Kong financial group that has been expanding. "It's very dynamic

For some Hong Kong busi-nessmen, deeply apprehensive about what will happen after the colony reverts to Chinese control Orders climbed to a seasonally adjusted total of \$101.2 billion in February compared to the revised total of \$95.5 billion in January. in 1997, having the Bank of Chi-na as a competitor may be strangely reassuring. It provides evidence of Beijing's willingness to tolerate capitalistic practices The gain was boosted by a 48.9 percent jump in orders for defense equipment. Even without this increase, however, demand for civilian durable goods climbed 3.8 per-cent after a 7.7 percent decline in and of its expanding financial stake in Hong Kong's well-being. In the process, China has been The key category of non-defense capital goods showed a 1.6 percent gaining financial experience and raising funds for tovestment on

decline in February. This category, which measures business tovestthe mainland. This growing presence in Hong Kong has not been pain-less, however. The Bank of China ment, had fallen 8.7 percent in January. Analysts said the weakness is group seems to be sacrificing being caused by the new U.S. tax profits to gain market share, and law, which removed tax benefits for diplomats and other bankers have doubts about the quality of its loan portfolio. It is also taking some significant risks as it develons its expensive new headquarters in the face of an extremely

Shearson Share Sale Approved to Nippon, Public

By James Sterngold New York Times Service NEW YORK - The board of American Express Co. approved Monday the sale of 40 percent of its Shearson Lehman Brothers brokerage subsidiary, giving both companies a significant international link. American Express said that it would sell 13 percent of Shearson to Nippon Life Insurance Co. for \$538 million and that it would sell

27 percent through an initial public offering and to its employees. Shearson is counting on the com-bination to give it significant access to the huge, but hard to crack, Japanese corporate market, as well as more than \$700 million in capital. That would make Shearson the largest securities company in the United States, leapfrogging it over the traditional leader, Merrill Lynch & Co., and Salomon Brothers. Shearson, currently No. 3, has

\$2.8 billion in capital. Nippon Life is by far Japan's largest insurance company, with \$90.2 billion in assets, and is the largest shareholder of securities in Japan, with a stake in more than

two-thirds of the 1,700 companies listed on the Tokyo Exchange. The companies said that, in addition to gaining two seats on Shearson's board, Nippon Life would place an adviser on the 19-member board of American Express, giving Nippon Life knowledge of and the ability to influence the strategic direction of one of the largest U.S.

financial conglomerates. A number of senior Wall Street executives described the transaction as an important step buth for Shearson and the U.S. securities industry, increasing the drive to build internationally. Shearson will become the second

major brokerage house to sell a large stake to a Japanese concern, following Goldman, Sachs & Co.'s sale of a 12.5 percent toterest to Sumitomo Bank Ltd. last year. There was also concern that the

Japanese might have begun a pro-cess of slowly dominating Wall Street through such investments in major brokerage houses, similar to the way they have taken control of pockets of the electronics industry.

Max C. Chapman Jr., president of Kidder, Peabody & Co., said the link with Nippon Life was far more important than the sale of more shares to the public because of the potential access the deal would give Shearson to the Japanese market. "This gives them more capital and insight into the Japanese market," he said. "But don't forget that it goes both ways. This gives them a hand in getting into this market, too."

Page 11

The companies also agreed to exchange personnel, which several analysts said could prove important to Nippon Life's growing anderstanding of how the U.S. and international capital markets work. Shearson and Nippon Life also will form a venture in London that will engage in the investment advi-See SHEARSON, Page 13

Nakasone Orders **Efforts to Calm** U.S. on Chips

TOKYO - Prime Minister Yasuhiro Nakasone intervened Tuesday to resolve Japan's dispute with the United States over trade in computer chips, government officials said.

Mr. Nakasone told Trade and Industry Minister Hajime Tamura at a cabinet meeting to double his efforts to calm U.S. anger at what Washington sees as Japan's unfair trade practices in semiconductors.

Mr. Nakasone's intervention came only two days before a scheduled meeting of the Reagan administration's Economic Policy Council to consider whether Japan has broken a pact on microchips.

That pact, signed last year after months of negotiations, calls on Japan to stop "dumping" chips, or selling them at cut-rate prices in world markets, and to iocrease its imports of U.S. chips.

IF YOU PURSUE outgrowth of the strong beliefs of its founder and principal share-

EXCELLENCE, Republic is firmly committed to such sound, traditional banking **ONLY ONE BANK** CAN KEEP UP.

> For Republic National Bank of New York, the relentless pursuit of excellence has achieved nothing less than excellent results.

Republic has grown to be the 11th largest bank in the United

States, in terms of shareholders' equity.

holder, Edmond J. Safra.

practices as diversification

Republic's subsidiary in Luxembourg provides private banking clients with the protection of the stringent banking laws of that country, and experienced

account officers who speak your language.

and the maintenance of a strong capital base.

The bank has always been highly selective in lending. It emphasizes very conservative activities, investing in safe and liquid assets and using its extensive expertise to trade profitably in precious metals, foreign exchange, bonds and bank notes. Underlying every aspect of Republic National Bank's pursuit of excellence is a single, fundamental principle: the protection of

And Republic's expertise internationally allows you to take advantage of opportunities to better manage your investments on a global scale.

The pursuit of excellence is our commitment. If that is something you expect of your bank, call us today at our Luxembourg office (352) 470711.

Disney, France Sign Agreement

On Theme Park

PARIS - Walt Disney Co. and the French government on Tuesday signed a definitive processing time for sheet steel used agreement to build and operate in automobiles and other products. Europe'a first Disneyland theme park.

The company said construc-tion on Eurodisneyland is to start next year on 4,800 acres (1,945 hoctares) at Marne-la-Vallee, about 20 miles (32 kilometers) east of Paris. The theme The new mill would have the park portion of the developcapacity to produce about one milment, which will include a relion tons of the high-quality steel annually. Mr. Luerssen said the sort and recreation complex, offices and shopping centers, will take about four years to build. plant would eliminate 500 to 600 jobs, but that the cuts might be The total initial investment parily offset by job increases at another Inland plant, which will supply the hot band steel to be has been put at 16 billion francs (\$2.62 billion.) Disney said it would seek other investors from

processed by the new venture. Under the agreement, Inland and Nippon Steel would each pro-France and elsewhere. Disney said provisions for a second theme park on the site vide \$150 million, with the other are included in the agreement leaders supplying the balance. Mr. Luerssen said the target cusand that the French govern-ment will extend the Paris Métomers would be Japanese auto-

tro system to the park and build makers setting up manufacturing plants in the United States as well interchanges and roads to provide superhighway access.

British Aerospace 1986 Profit Fell 34% After Plant Charge

يحذاهن للتحل

By Warren Getler tional Herald Tribun

LONDON --- British Aerospace PLC, one of Europe's biggest manufacturers of aircraft and weapons systems, said Tuesday that 1986 earnings fell 34 percent to £84.3 million (\$136 million at current exchange rates) from £127 million after tax in 1985.

Those results, reflecting an extraordinary charge of £51 million for the already announced closure of a manufacturing plant, compare with a 21 percent rise in pretax profit to £182.2 million from £150.5 million.

Meanwhile, Sir Austin Pearce, the company's chairman, said BAe received a "totally inadesortium that builds the plane. quate" offer of long-term British government

loans to help launch two jets planned by Airbus Industrie, the four-nation European consortium in which BAe holds a 20 percent stake. He warned that unless the company gets an offer approaching the £750 million it requested, "we will not be part of the A-330/A-340 project." Group sales for Britain's leading defense contractor climbed 18 percent to £3.14 billion last year from £2.65 billion in 1985. Earningsper-share fell to 51.4 pence from 56.4 pence. The company's backlog of orders in 1986 surged 69 percent to 58.6 billion from £5.14 billion. About £2.5 billion to £3 billion of this backlog reflects its share of a £5 billion sale of Tornado fighter aircraft to Saudi Arabia. BAe is a member in a three-member European con-

Analysis at Kleinwort Grieveson Securities Ltd, the London stockbrokers, said BAe's 1986 pretax results were at the low end of expectations, but noted the company should be able to boost pretax profit in the current year by 15 percent to 20 percent to total £210 million to £220 million.

Page 13

The company said 1986 losses io its civil aircraft division, which includes work on Airbus aircraft, more than trebled to £7.7 million from £2.5 million in 1985 and cited fierce competition and the strength of sterling.

The military aircraft division recorded slightly lower pretax profits in 1986 of £146 million from £148.3 million, but profits from guided weapon and electronics systems rose 9 percent to £139.7 million.

5.5% Drop in Pretax Profit LONDON --- Standard Char- exposure in the Asian/Pacific redebt - particularly for the group's tered Bank PLC recorded Tuesday gion - as the chief factor behind a 5.5 percent drop in 1986 pretax profit, the only one of five major million (\$408 million) in 1986, British clearing banks to report from £267.9 million in 1985. the fall in pretax earnings to £253.9

lower profit for 1986. Standard cited sharply increased provisions for bad and doubtful £545.6 million in 1986, from £416.6 million. The charge for bad and doubtful debt soared to 184.2 mil-

Norcros Rejects \$542 Million **Bid by Williams**

LONDON - Norcros PLC, the building products and packaging group, Tuesday rejected a £542.2 million (\$876.8 million) bid for its ordinary shares from Williams Holdings PLC. The industrial holding group said carlier Tuesday it had of-fered 29 new Williams shares for every 50 in Norcros, or 432.7 pence per share. But Norcros said the offer was unwelcome and it signifi-

cantly undervalued the stock. In midsession trading on the In Indeession tracing on the London Stock Exchange, Nor-cros was quoted at 418 pence, up from 397 Monday. Williams

was 15 pence higher at 765. The offer also included a partial convertible alternative in which shareholders would re-ceive up to 205.69 million new second convertible shares in Williams instead of ordinary share allocations.

The convertible offer, at 428 pence per share, is on the basis of four Williams convertibles for every Norcros share. The cash offer is the equivalent of 400.2 pence a share.

table now. I'm not going to leave it hanging out there." He said the offer might be made again at B meeting of world finance ministers in Washington in two weeks.

(Continued from first finance page) skills in credit analysis. It was an inauspicious start. The property market collapsed in 1982, along with much of Hong Kong's economy, and there are indications that many members of the banking group had substantial losses.

Court records show that several of the banks had lent heavily to the Carrian Group, a Hong Kong in-vestment firm that failed in 1983. Apparently, the individual banks did not know that others in the group also had lent to Carrian. To avoid such credit risks, the Bank of

China formed a Hong Kong and Macao regional office, which oversees the sister banks and approves large loans. The sisters are also linked by computer, and clear checks among themselves. Mr. Huang became chief execu-

tive of the regional office in late 1985 and soon began to shuffle people into retirement. As the previous head of the Bank of China's internatiooal division in Beijing, Mr. Huang appears to be highly regarded in the Communist hierarchy. He a good branch network and excel is still in his mid-50s - young for a lent mortgage terms.

have been set up, attended by thousands of employees. Nevertheless, there are strong indications that bad loans are substantial and that profitability is low. The problem in making such ssments, however, is that the group's fioancial reports are sketchy and, with the exception of those of the four sister banks registered in Hong Kong, are unaudited

by outside accounting firms. Even by their official earnings statements, the profits of many of the group's banks have fallen in the last few years, after adjusting for a for example, the Bank of Communications, reported a \$25.3 million lion in 1985, the most recent year

Interest rate margins on restrict-Africa and appeared to have been ed debt would remain the same as largely on Pretoria's terms. The acduring the first interim agreement, and South Africa would continue JOHANNESEURG - South cord is expected to be endorsed by Africa and its rnajor commercial South Africa's other 299 creditors to pay all interest on its foreign bank creditors have agreed to exwho account for the remaining 20 and for three years specific limits on the country's repayments of \$13 billion in foreign debt it froze last year, Finance Minister Barend do Plessis said Tuesday. percent of the short-term debt. The agreement with the coun-

try's 34 major creditor banks, who hold 80 percent of the short-term debt, was reached at a meeting in London on Tuesday by South Africa's committee coordinating the freeze on this portion of the total foreign debt of around \$24 billion. Pretoria froze its short-term for-

South Africa agreed to repay 5 perign debt repayments in August cent of this short-term debt over a 1985, following the refusal of some period that ends June 30 this year. TMr. du Plessiz: said a down-payloans. South Africa also owes \$10 ent of 5 percent of the short-term billion in medium-term debt that debt, amounting to about \$508 milwas not affected by the standstill hion, would be made in the second half of this year. The Associated and that will be repayable on the maturity dates specified in the loan Press reported from Pretoria; appreements.

press conference. Another \$400 would be made during 1988; \$346 million, or 3 percent, during 1989, and a repayment of \$166 million during the first half of 1990.]

agreement was favorable to South

where the finance minister held a Mr. du Plessis said South Africa would also continue to repay other debt that fell outside the payment freeze, such as that owed to the International Monetary Fund.

forced to renege on its foreign debt. But the agreement, probably aided by the turn for the worse that the Third World debt problem has tak-American banks to renew the en in recent months, did not hold banking sources said.

out any immediate prospect of South Africa's regaining access to international capital markets, "We believe that the available foreign reserves of the Reserve

Bank, which increased by about \$800 million during the past two months, and the expected continued surplus on the current account

of the balance of payments, will be Banking sources said that the sufficient to meet these commitments," Mr. du Plessis said.

"We made a proposal this mornrement of their problem as well

tries. "They were oot prepared to

BOOKS

HOLD ON, MR. PRESIDENT

By Sam Donaldson. 260 pages. \$17.95. Random House, 201 East 50th Street, New York, N. Y. 10022.

Reviewed by Jane Leavy

AM GLAD there is a Sam Donaldson. I 1 am glad there is someone willing to stand out on the lawn of the White House and huri pointed, impolitic questions into the din of a licopter rotor at a president who, as Donaldson tells it, is both hard of hearing and selective in his bearing.

I'm convinced that the United States is a better, safer place thanks to Donaldson's persistent impertinent

l am not so glad he decided 10 chronicle all his adventures. "Hold On, Mr. President" tells you everything you'd ever want to know about Sam Donaldson and a whole lot more.

He sounds like a hell of guy. He makes his own bed. And in the days after the breakup of his second marriage, he learned how to grow roses and to keep fresh flowers in the house every day. He even kept the apartment clean without any help.

While these revelations may soothe those ABC television viewers who think abrasive is Donaldson's middle name, they do not make for great literature. Or great human insight. Television measures time in "air bites" those snappy morsels of information, "Killer Bees Head North - more at 11." What we have here is 255 pages of air bites, tantalizing tidbits of this and that, clean kills and gaffes, anecdote and analysis. Like Donaldson's career, the book is all over the place.

Obviously, there are thoughtful, probing books to be written about covering the presidency, about stage-managing the news, about ethics in journalism, about phrasing questions that demand an answer — and Donaldson touches on all these, but that's all. And that's too bad because Donaldson is at his best when he resembles the reporter you see on the air, the one named Best Television Correspondent by the Washington Journalism Review.

A seasoned Washington political reporter once said, "If there was no television, Donaldson would go door to door." Trying too hard pays off in reporting but not necessarily in humor. Take his account of the day he worked as pool reporter during the first Reagan-Gor-

When 8 Is Nothing, 4 Approaches Infinity Midwest Regional final. As Fess al finalists? (Navy, Kentucky,

VANTAGE POINT/ John Feinstein

Irvin stepped to the foul line with LSU leading, 76-75, and 26 seconds left, Packer said, "This is why the Dean Smith, North Carolina's coach, used to claim money in this tournament should be distributed differently. This kid that getting to the Final Four was harder than is shooting a \$200,000 free throw."

Had Irvin made both free throws, Indiana would have needed a three-point field goal to tic; had LSU held on to win, it would have been worth an additional \$200,000 in NCAA tournament money to the school. That's the difference between being a regional finalist (worth about \$800,000) and going

to the Final Four. Irvin's miss - a brick off the front rim - probably had little to do with any thoughts about money. It had to do with the aura that surrounds the Final Four and the pressure that players and coaches in a regional final feel.

"In 1985 when we were playing St. John's in the West Regional final, we had the lead with 12 minutes left," said North Carolina State's coach, Jim Valvano. "I wanted to get a time-out right then just so I could point to the scoreboard and say to the kids. Now look, we're exactly 12 minutes from the goal we set at the beginning of season. Twelve minutes from the the Final Four.' "

College basketball is rare in that few teams start out the season with the national title as their goal. Most players and coaches will tell you e goal is to get to the Final Four.

In no other sport does a quarterfi-nal game — which is what the regional finals are - mean so much. In no other sport do you cut down a net for reaching the semifinals.

This is not to say that reaching the Final Four is somehow better than winning the national championship, although Dean Smith, North Carolina's coach, used to claim that getting to the Final Four was harder than winning the title, Just reaching the Final Four makes a team, its

coaches and its players winners. And it goes beyond that, History shows that admission applications at schools that make the Final Four go up the next year because of the exposure associated with the weekend extravaganza, Applications to the summer camps run by Final Four coaches inevitably go up, as do their clinic fees, speaking fees and shoe contracts. The players get the glory and exposure to pro scouts and they take home memories. But what happens to the teat

Washington Post Service and players and coaches who are point guard Kenny Smith, on the to lose, you might as well lose in the WASHINGTON — It was Billy within a free throw (LSU) or a bad losing side for the second time in his round of 16 because no one remembers Packer who made the comment pass (lowa) of the Final Four but second regional final last Saturday. bers anything you've done unless Sunday during the final moments don't get there? How many people "One of my goals was to play in the you get to the Final Four." of the Indiana-Louisiana State remember last year's losing region-Final Four. Now, that's gone." Pittsburgh Coach Paul Evans, After his team beat Florida in the who took Navy to the final eight a year ago before losing to Duke, "We got hammered, so there wasn't any what-iffing or anything," he said "But you can't escape the feeling that a great opportunity was there and it slipped away. You don't know when you'll get another chance like that when you're just one good game away."

Or one shot away. "If you get to the Final Four, people say you've had a successful season," said Dean Smith, who won his first seven regional finals but has lost his last three. "If you get to the regional final and lose, people just say, Well, they had a chance and didn't get there."

'You can't take one game and say it makes or breaks a season or a career," Kenny Smith insisted Saturday. "You can't measure people, or growth, or any of the other things, based on winning or losing one game. But people do that."

They do indeed. Matt Doherty, who played on North Carolina's national championship team in 1982 before graduating in 1984, was at the game Saturday. When he saw Syracuse's 29-12 rebounding edge at halftime, his first reaction was pure instinct: "How can you let that happen to you when you're only 40 minutes from the Final Four? If there's ever a game you suck it up for, it's one like this."

Boeheim, criticized for years because of a mediocre NCAA record, tried to shrug off the importance of the victory for him Sanurday. "Tm no better a coach today than I was yesterday," he said. "But because so much emphasis is put on winning, people will perceive me to be a better coach. O.K., if that's the case. I'll take it. I've had it the other way long enough."

The other way is to what if your-self all summer. North Carolina will always see Kenny Smith's threepoint shot that could have tied the Syracuse game rimming out: Georgetown will remember Providence's amazing blitz inside; LSU (which made the Final Four in 1986) will recall Rick Calloway's rebound basket and Nikita Wilson's miss; Iowa will see Kevin Gamble's misguided pass to Brad Lohaus,

Wilson, whose shot that bounced off the rim would have put LSU into the Final Four, said it best: "Getting to the Final Four is the best feeling in the world. This is the worst."

U.S. High School Following Pros' Pie-in-the-Sky Recipe - New York Times Service NEW YORK -Call it trickle-down finance, if you will, but those hunry sky boxes that are a standard feature of pro stadiums have now statistic simplified the high school level. With simplify, the scene is trend-setting California, where Village Christian High in Sun Valley, north of Los Angeles, has become what is believed to be the country's first high school to play copy the fat cat. The private school are the scene is trend-setting completed last fall, has two

The private school's new gyunasium, completed last fall, has two fully carpeted enclosed boxes in the balcony, each with tables and 22 padded scats. Nestled side by side at one end of the gym, the boxes were the brainchild of the 100-acre (40-hectare) school's plants manager, Terry Spahr, who figured they could do for Village Christian what they do for the pros - raise extra money.

Each seat comes complete with waiter service, for hamburgers and hot dogs from the snack bar, and individual keys for purchasers. Spair, who dreamed of raising more than \$20,000 a year, figured the baxes would prove irresistible to school boosters, who would be guaranteed preferred seating at every gym event from basketball and volleyball games to school plays and concerts. And unlike big-time statiums, which generally lease multiseat boxes only as a whole at a cost that can exceed \$50,000 a season. Village Christian allows the purchase of individual seats, making a splurge on a huxury location

The affordable. Still, if the early experience is any guide, it may be a while before the

movement spreads to other high schools. When the seats were offered for sale at \$500 a year, the response was so poor that Village Christian had to mark them down to \$250. Even then, there wasn't a stampede: So far, Spahr says, only 14 of the 14 scars have been sold, raising about \$4,000.

OBSERVER CBS on the Firing Line

By Russell Baker New YORK — People in the oews business tend to forget it's a business, so when something like the firings at CBS News jolts them back to reality, they respond

natural and explains why news people have given the CBS story such extensive coverage. Press crit-ics are saying the coverage is out of because of the oceans of malarkey proportion to the numbers fired, spoken and written about "the where other shops are firing thousands, but this misses a bizarre point which press critics should be nated in declarations, accusations the first to grasp:

News people cannot resist the that you are part of a powerful delusion that they are different. organism — "the media" — that Few can hring themselves to ac-knowledge that they are hired makes and unmakes governments, hands who become expendable that dispenses cruel justice or whenever the boss scowls at the grants quixotic mercy at a whim work is supposed to be the ureless pursuit of truth, yet they cannot resist lying to themselves about ably fail to notice that yon have their own situation.

The disproportionate coverage given to a couple of hundred firings than with the buccaneers of Wall at CBS is not excessive from the Street or even with doctors and newsfolks' viewpoint, because it is lawyers. oot about firings; it is about an assault on a mass delusion. п

I first noticed the power of this delusion 40 years ago in Baltimore when I was a kid reporter active in trying to organize the newsroom in a labor union. Resistance from the graybeards was fierce, and ooi solely because they regarded me as a youthful sorehead who had succumbed to Bolshevism because my pay was only \$30 a week.

Their fiercer objection was that being news people meant they were "professiooals." And professiooal people, they argued, did not join labor unions.

Fortunately, the boss was a realist, so he didn't know the depth of his reporters' self-deception or understand that this was his most powerful weapon against the union. Talking one day about who was entitled to more than sweatshop pay, be made the mistake of singling out a half-dozen faithful old-timers who had been with the paper forever and telling union oeequiators it was outrageous to ask him to pay these "aged incompe-tents" more than \$60 a week. After that was duly publicized,

most of the staff forgot their "professionalism" long enough to join the union, but doubtless resumed thinking of themselves as "profes-sionals" once the chilly exposure to reality wore off. with shock and rage. Psychologically, this is entirely more elegant than hired hands is If the illusion of being something

even stronger in the era of the CBS firings than it was in the age of \$30particularly io a labor market power of the media" since politics turned into television.

When you are constantly mariand denunciations, all to the effect more in commoo with disemploya-

ble steel workers in the Rust Belt The conservative right has done

beroic work in creating the illusion of the amazingly "powerful me-dia." In the right's "Catalogue of Simple Explanations of Everything That's Wrong With the World," one of the biggest entries is "the

media. When a rightist says "The media did it," he is referring to what he perceives as a conspiracy of the three network television news departments, The New York Times, The Washington Post, Time maga-zine and Newsweek. Rightists who wanted to strangle the media monster used to talk about gaining con-

trol of CBS so they could become Dan Rather's boss." Not surprisingly, all this encouraged ocws people everywhere, but especially those of the designated "powerful media," to settle deeper into the delusion that they lived a

far world away from luckless steel workers and mill hands who ruin the boss's bottom line. Then Laurour tax dollars," ence A. Tiscb hought CBS and woke everybody up. Tisch is a hotel man. Chambermaids doo't kid themselves. He must bave thought

Nicaragua **Relives** Its **Yankee Past**

was inaugurated presideot in 1857 before being executed by fir-By Stephen Kinzer New York Times Service ing squad in 1860 at the age of 36. RANADA, Nicaragua

G This graceful and dignified city, founded in 1524, is the only In Nicaragua, he is regarded as the epitome of the thoughtlessly place in Nicaragua where one feels in touch with Latin Ameribrutal Yankee who wreaks destruction under the illusion that be is spreading democracy. Nicaraguan officials reviewed the script before giving permisca's colonial past. Sculpted iron balconies protrude from white-washed buildings, and strong ce-

sioo for filming; and representadar beams support elegaot churches. Dominating the plaza is the enormous building that once housed the Granada Social Club, tives of the state-run Nicaraguan Cinema Institute are working closely with the filmmakers. All which in bygone days was the gathering place for Nicaragua's involved share a view that U.S. policy toward Nicaragua is fun-damentally immoral. "Walker" is highest society. The building came into govern-ment hands following the Sandinscheduled for release late this

The title role is played by Ed Harris, who portrayed John Glenn in "The Right Stuff." Like ist takeover in 1979, and today it is being used as beadquarters for an international crew making what its American backers bope the director and many others involved in the project, Harris is working for a substantially re-duced fee because be agrees with will be a film that profoundly influences perceptions of Nicarathe film's political perspective. The budget is a relatively modest Downstairs, in what was once a private salon beside the vast mar-\$6 million or \$7 million.

ble dance floor, seamstresses are "It's a fascinating story and a great character," Harris said, "Walker came down here in the name of democracy, without any making costumes and carpenters are huilding sets. Upstairs, the film's British-born director, Alex Cox, whose credits include "Repo understanding of this country or Man" and "Sid and Nancy," its history or social customs. works on storyboards when not Comparing that to what's hap-pening today, I have a small susconsulting with the Americans, Britons, Spaniards, Mexicans and Nicaraguans with whom he picion there is a point to be made. Hopefully people who see the movie will enjoy the ride, and by the end they will have been hit by Cox says he wants to make a statement against U.S. policy in something that causes them to Central America, specifically its think."

support for the Nicaraguan anti-government forces, the contras. "The U.S. government, with the Cox has a reputation for origi-nality, and "Walker" is very unsupport of my own government, is aiding and abetting a stupid, pointless massacre of people who like conventional historical drama. The script, written by Andy Wurlitzer, who also wrote "Two Lane Blacktop" and "Pat Garrett and Billy the Kid." is full of don't mean them any harm at all. We are responsible for this. It's quirky time warps and striking

gua in the United States.

works.

Director Cox (left) with Ed Harris, who plays the adventurer William Walker.

straight" said Harris, "but there are certain situations, certain lines where, if the audience is not laughing, they're not getting it."

The film's producer, Ed Pressman, is also producing "Wall Street," the forthcoming film by Oliver Stone, who wrote and directed "Platoon."

Perhaps oo nongovernmental project in the eight years of San-dinist rule in Nicaragua has been as fully supported by the govern-ment as the production of "Walk-er," which is scheduled to cooinue until the end of April. When set designers asked that telephone poles in central Granada be removed, the poles were removed. When helicopters and explosives were occided, the army agreed to provide them. In a country where the distributioo of wood is tightly

controlled by the government, 15,000 sheets of plywood and tons of planking are being assigned to the production. Much of the wood will ultimately be destroyed when the filmmakers re-create the borniog of Granada, ooe of

The man coordinating Nicaraguan cooperation with the makers of "Walker" is Carlos Alvarez, a Chilean-born official of the Nicaraguan Cinema Institute. Alvarez recently invited a visitor to Asese. a cove oear Granada, where Mexican carpenters were supervising the construction of a waterfront town that will be used to portray San Francisco, the place where Walker and his 58 "immortals" ---as the popular press in the United States called them - embarked for Nicaragua in 1855. An old cargo vessel is being turned into a model of Walker's ship, the Vesta.

"Before deciding to cooperate with the making of this film," Alvarez said, "we assessed the script from a political and aes-Award nominee for her role in thetic perspective. Walker is a very controversial personality. and it was important that history be told in a correct way. In this film, you don't find backward Central Americans who cower in the face of Rambo-type fighters. You come to understand how ridiculous and absurd it is to think of an American invasion of Nica-

Walker was a dedicated newspaper editor and idealistic lawyer who considered a political career and yearned for a life of quiet domesticity. But somethiog snapped inside him when the only woman he ever loved, Ellen Martin, died in New Orleans during a cholera epidemic in 1849. Acconding to one biographer, Walker's "quiet, serious, gentle and kind" nature quickly changed, and he became "melancholy. occasionally almost paranoid in his behavior, and obsessed with a longing for reckless and daring action regardless of the consequences." Ellen Martin, who had impaired hearing, will be played by Marlee Matlin, an Academy

Children of a Lesser God." "Walker was a guy who was completely ont of touch with reality, who thought he was acting on Christian principles but who olinded himself to the fact that he was slaoghtering the people he came here to regenerate." Cox said. "That's something to think about." sign. She refused.

Evel Knievel Wants To Share Some Fame

The former motorcycle sturit, man Evel Knievel, wants to bringer, bit of his fame back to his native Butte, Montana, Knievel, 47, who gave up stunts after a 1975 accdent, wants to turn one of Butte's abandoned schools into an Evel Knievel Hall of Fame museum One person who will probably not visit it is a man in Moses Lake, Washington, who punched the for-mer daredevil in a restaurant bar. Witnesses to the fight Sunday said a local apparently struck him without provocation after offering un-solicited criticism of Knievel's cycling skills.

The English composer Harrison Birtwistle has won the S150.000 Grawencyer Award for Composi-tion for his opera "The Mask of Orpheus." The eward is given by the University of Louisville (Kentucky) in recognition of outstanding achievement by a composer. Birtwistle, 53, lives in southern France. "The Mask of Orpheus," given its premiere in London last May, is a four-hour work featuring masked singers, mimes and clar-tronic music. It was selected from 95 pieces submitted from 20 courttrics.

Oliver Stone, who directed "Pla-toon," says the New York financial establishment seems to be worning about what he will do in his upcuiting movie, "Wall Street." He says he plans to use "a lot of authentic brokers playing themselves in the film, which will star Michael Daug-les, Charlie Shees and Datyi Haunah. Stone, nominated for Oscars for both "Platoon" and "Salvador," said he co-wrote the "Wall Street" screenpiny with Stanley Weiser "even before the firm Boesky thing hit."

A woman who was fired by Coca-Cola over her love affair with a man employed by its arch rival, Pepsi-Cola, has been compensated by her former employers in an out-of-court settlement. Annual Cont-la was chaming \$600,000 in high ages for her dismissal. She fell in love with David Conklin, who left Coca-Cola to join Pepsi. The com-pany gave Amanda three options: to break off her engagement, persuade her fiancé to return, or re-
